## AMENDMENTS TO THE CLAIMS

- 1. (Currently Amended) An accessed object having comprising a non-contact IC module including a semiconductor device and a radio communication antenna coil connected to said semiconductor device, wherein one of said radio communication antenna includes an IC module coil is formed extending over two side surfaces of different directions of said accessed object.
- 2. (Currently Amended) An accessed object according to Claim 1, wherein said semiconductor device and said radio communication antenna <u>coil</u> are formed on a flexible sheet and said sheet is bent and attached to said accessed object.
- 3. (Original) An accessed object according to Claim 2, wherein a semiconductor device is provided in that position of said sheet which is away from the bent portion thereof.
- 4. (Currently Amended) An accessed object according to Claim 1, wherein said radio communication antenna <u>coil</u> is provided in the vicinity of a corner portion of the said accessed object.
- 5. (Currently Amended) An accessed Accessed body according to Claim 1, wherein said accessed object has a casing and said radio communication antenna coil is provided inside said casing.

- 6. (Original) An accessed object according to Claim 5, wherein said casing is opaque or translucent.
- 7. (Currently Amended) An accessed object according to Claim 1, wherein said accessed object is <a href="holding">holding</a> an information recording medium.
  - 8-14. (Cancelled)
